

## Ultrasonic Welder with a 20-inch Reach

*UW-12, 20-Inch Stroke Actuator*

### General Description

Stroking a horn 20 inches is sometimes needed if welding into a hard to reach area or in this case, a part that can not be unloaded with a 6-inch stroke actuator in the way.

This standard actuator was mounted on a slide with 16 inches of stroke. The actuator is first lowered into position and then the horn extends to weld. This machine welds an ice chute to the inside of a freezer door.
