

## Big Style Sound Box

*UW-8*

### General Description

For insert welding into large automotive parts, a large sound box is needed. This three-side sound box has a 25" tall opening and is 45" wide and 18" of side opening. The door is an up to close so there is good access to the welder.

With three side access to the fixture area, it makes it easy for the operator to load and unload parts from other work areas. This machine has a light curtain, so the operator does not have to maintain the start buttons.
